

How to consult your Edition code?

In order to visualize your **edition code**, we invite you to go on your online Member Area with your passwords:

- **Your laboratory number**
- **Your input password**
- **Your validation password**

Step 1

Services management application

You are now connected to Bipea member file server. For security reasons, your connection will be cut down within 30 minutes if you do not use the system.

You must identify yourself to have access to your reply forms by entering your code member and your input password or validation password (be careful to the capital letters):

- Use your input password to input your results in the forms
- Use your validation password to validate your forms and transmit to BIPEA.

Language: GB-English

Laboratory number:

Password:

Go to your online Member Area on our website www.bipea.org

You can also use the direct access with the link: <https://extranet.bipea.org>

Please connect with your **laboratory number** and your current **input password**.

In case of passwords loss, we will send you them back by letter after receiving your written request.

Step 2

Laboratory 10000

View the edition code

Change the password

Quit

Form list

Simple mode

Click on the button at the top left of the screen.

You will have access to the option « **View the edition code** » in order to access the step 3.

Step 3

View the edition code

You will find on this page your laboratory edition code.

Please indicate the Input Password and the Validation Password as communicated by Bipea. After verification we will provide you the edition code.

Laboratory number:

Input password:

Validation password:

Enter your passwords (*laboratory number, input password, validation password*) and validate.

Your **Edition code** for the current annual series will appear on the screen.

This code permits you to identify your results in the interlaboratory comparisons report.

The edition code is changed at the beginning of each annual series and cannot be modified during the campaign.
